

Tank2o is a range of WRAS approved Sectional and One Piece GRP Tanks.

ONE PIECE TANKS

Fully encapsulated insulation to sides and close fitting lid. Lid is fully removable for maintenance.

CFC Free PU foam insulation is completely encapsulated within the GRP laminate.

Suitable for Potable and Non Potable water storage.

Available with horizontal flange.

Our one piece tanks can be supplied in two parts, pre drilled with stainless steel bolts and gasket for quick and easy assembly on site.

Standard items include;

- Integral base board support
- Screened vent
- 25mm insulation
- Type AG air gap
- Flanged outlet
- Screened overflow

Optional items include;

- Type AB air gap via raised ball valve housing
- Float operated level control switch
- Drip tray
- Temperature sensors
- Level gauges
- Drain down kits

SECTIONAL TANKS

Designed in a modular format which allows for a comprehensive range of tank sizes and configurations.

Sectional water tanks comprise individual bolt-up panels which are assembled on site.

For storing water in large capacities - from 125 litres up to 2,000,000 litres

Three different tank types; Internally flanged base, Externally flanged base and Totally internally flanged.

Standard items include;

- Hot press moulded panels
- Screened vent
- 25mm insulation
- Manway
- Flanged outlet
- Screened overflow

Optional items include;

- Type AB air gap via raised ball valve housing
- Float operated level control switch
- Site survey
- Temperature sensors
- Level gauges
- Base steels
